Subject : Honey quality tests

The Institute for Scientific and Technological Research and Services, King Mongkut's University of Technology Thonburi has finished testing the quality of honey. The eight parameters were tested in the honey sample to determine the honey's quality. Results are tabulated as the following:-

Very truly yours,

(Dr. Kanteera Soontharapirakul)

(Assoc. Prof. Dr. Orawan Duangphakdee)

Analyst/Laboratory Manager

Director of Native Honeybee and Pollinator Research Center

Testing parameter	Result	Unit	Reference method
Antioxidant Activity (DPPH)	97.04%	% DPPH inhibition at 0.1 mg/ml	Pontis JA et al. Food Science and Technology, 2014, then Calculation
Proteinase inhibition	98.00%	% proteinase inhibition at 0.1 mg/ml	Ruiz-Ruiz JC et al., Food and agricultural immunology, 2017, then Calculation

This report is valid only for the specimens tested. It does not apply to other pieces of material or products even through made by the same manufacture.
